Define Problem Statements

Customer Problem Statement

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	3 Marks

Problem Context

Renters often spend significant time comparing scattered property information and contacting owners without knowing whether a listing is still available. Property owners need a simple way to publish and update listings, while platform administrators need visibility over users, properties, and bookings.

Problem Statements

ID	Customer	Trying to	Barrier	Resulting feeling / impact
PS-1	Renter	Find a suitable available rental	Listings and owner details are fragmented	Uncertainty and wasted time
PS-2	Property owner	Publish and manage a property	No centralized approval and booking workflow	Administrative overhead
PS-3	Administrator	Maintain marketplace trust	Limited oversight of owner access and platform activity	Operational risk

How the Project Responds

- Centralized property cards and filters.
- Owner registration with administrator approval.
- JWT-protected role dashboards.
- Booking requests with owner-managed status.
- Administrator views for users, properties, and bookings.
