Problem-Solution Fit

Project Design Phase

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	5 Marks

Canvas Area	House Rent Project
Customer segments	Renters, property owners, and marketplace administrators.
Problems / pains	Fragmented listing information, uncertain availability, manual owner follow-up, and weak oversight.
Existing alternatives	Classified sites, social media groups, brokers, direct phone calls.
Customer limitations	Time, trust, inconsistent data, and limited visibility into request status.
Triggers to act	Relocation, rent renewal, new property availability, urgent housing need.
Behavior	Searches by location/type, compares details, contacts owners, tracks responses.
Channels	Responsive web application and GitHub-hosted source code.
Your solution	A MERN platform with searchable listings, owner-managed properties, booking workflow, and administrator oversight.
Expected outcome	Faster discovery, clearer status, and centralized management.
