Proposed Solution

Project Proposal

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	5 Marks

Project Overview

Field	Details
Objective	Provide one web application for renters to discover properties, owners to manage listings and bookings, and administrators to supervise marketplace activity.
Scope	Registration, login, property listings and filters, image upload, booking requests/status, owner approval, and administrator reporting views.
Out of scope	Payments, legal agreements, identity verification, real-time chat, maps, and production hosting are not implemented in the current repository.

Key Features

- Renter and owner registration.
- One-day JWT login sessions.
- Administrator approval for owner access.
- Property creation, update, deletion, and image upload.
- Public property browsing and filtering.
- Booking requests and role-specific booking history.
- Administrator views for all platform records.

Resource Requirements

Type	Requirement
Hardware	Development computer with 4 GB RAM minimum; 8 GB recommended.
Runtime	Node.js and npm.

Type	Requirement
Database	MongoDB local instance or MongoDB Atlas connection.
Development	Git, a code editor, and a modern web browser.
