Code Layout, Readability and Reusability

Project Development Phase

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	5 Marks

Quality Parameter	Assessment	Evidence / Improvement
Folder structure	Yes	Frontend modules and backend routes/controllers/schemas are separated.
Naming	Partial	Most names are descriptive; spelling inconsistencies include authMiddlware and propertId.
Modularity	Yes	Role-specific controllers and components reduce coupling.
Comments	Partial	Backend contains section comments; frontend coverage is limited.
Error handling	Partial	Try/catch is common, but some controllers do not return an error response.
Reusability	Partial	Shared listing card is reused; API base URL and auth handling should be centralized.
Redundant code	Partial	Some stale comments and copied wording remain.
Automated tests	No	Backend test script reports no tests; CRA test dependencies exist but no project tests were found.

Reusable Modules

Module	Reuse
authMiddlware.js	Protects user, owner, and admin endpoints.
AllPropertiesCards.jsx	Displays and filters property cards for public/renter views.
Mongoose schemas	Central contracts for user, property, and booking data.
Role home components	Provide consistent dashboard navigation and logout behavior.
