Coding & Solution

Project Development Phase

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	5 Marks

Field	Details
Repository	https://github.com/naveenduvva692004-collab/house-rent-master
Languages	JavaScript, JSX, CSS, HTML
Frameworks	React, Express, Mongoose
Implemented	Authentication, role dashboards, listings, owner property CRUD, image upload, booking workflow, admin monitoring
Pending	Role-based server authorization, verified password reset, tests, deployment configuration, notifications, payments
Run method	Install frontend/backend dependencies, configure backend environment variables, start both services

Implementation Alignment

- The route layer maps HTTP endpoints to role-specific controllers.
- Mongoose schemas define the three core entities.
- React routes and dashboards mirror Renter, Owner, and Admin user types.
- Multer stores images locally and Express exposes them through /uploads.
- JWT middleware injects the authenticated user ID into protected requests.
