Project Executable Files

Project Documentation

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)

Submission Checklist

Item	Status	Location / Note
Source code	Available	https://github.com/naveenduvva692004-collab/house-rent-master
Frontend dependencies	Available	frontend/package.json and package-lock.json
Backend dependencies	Available	backend/package.json and package-lock.json
Database schemas	Available	backend/schemas
Environment template	Missing	Create .env.example with PORT, MONGO_DB, and JWT_KEY placeholders
Automated tests	Missing	Backend script explicitly has no test; add API and UI tests
Deployment URL	Not provided	No verified hosted URL in repository
Demo video	Referenced in old document	Verify access and ownership before submission

Repository Structure

```
house-rent-master/
├── frontend/
│   ├── public/
│   └── src/
│       ├── images/
│       └── modules/{common,admin,user}/
├── backend/
│   ├── config/
│   ├── controllers/
│   ├── middlewares/
│   ├── routes/
│   ├── schemas/
│   ├── uploads/
│   └── index.js
```

```
└── Full_stack_mern_stackn_documentation.docx
```

Environment Variables

```
PORT=8001
MONGO_DB=mongodb://127.0.0.1:27017/house_rent
JWT_KEY=replace_with_a_long_random_secret
```

Run Instructions

1. Clone the repository.
2. In backend, run npm install and create .env.
3. Start MongoDB or configure MongoDB Atlas.
4. Run npm start in backend.
5. In frontend, run npm install and npm start.
6. Open http://localhost:3000.

Important Configuration Note

The frontend calls http://localhost:8001, while the backend defaults to port 8000 if PORT is not set. Set PORT=8001 or move the client API base URL to an environment variable.
