Solution Requirements

Functional and Non-Functional Requirements

Date	17 July 2026
Team ID	Not provided
Project Name	House Rent Management System (HouseHunt / RentEase)
Maximum Marks	4 Marks

Functional Requirements

ID	Category	Requirement	Priority
FR-01	Registration	Users can register as Renter or Owner; owner starts ungranted.	High
FR-02	Authentication	Users can log in and receive a one-day JWT.	High
FR-03	Property discovery	Users can view and filter all property listings.	High
FR-04	Booking	Authenticated renters can submit booking details.	High
FR-05	Owner management	Approved owners can add, update, and delete their properties.	High
FR-06	Booking status	Owners can update booking status and property availability.	High
FR-07	Administration	Admin can review users, approve owners, and view properties/bookings.	High
FR-08	Password reset	User can replace a forgotten password using an email address.	Medium

Non-Functional Requirements

Category	Target / Acceptance Criterion
Security	Hash passwords; validate JWTs; add role authorization and verified reset before production.
Performance	Common listing and dashboard requests should complete within 2 seconds under normal academic-demo load.
Reliability	Return consistent error objects and avoid unhandled promise failures.
Usability	Key renter, owner, and admin tasks should be reachable from their dashboard.

Category	Target / Acceptance Criterion
Maintainability	Keep routes, controllers, schemas, and UI modules separated.
Compatibility	Support current desktop versions of Chrome, Firefox, and Safari per CRA browserslist.
